# About Us.

i Pest Control is the leading Pest Management Service company in the Kingdom of Bahrain within our sector and is recognized by our customers, suppliers and industry associates as the number one choice for exceptional standards, value for money and consistent service improvements, always tailored to meet our client's needs.

iPC's parent Company was Dream Group, established in 2004 and Headquartered in Sitra, in the Kingdom of Bahrain with a manpower of around 3000 skilled employees and professionals. Dream Group was the leader in the provision of Unique, Integrated Services and was an ISO 9001:2008 Accredited Company. iPC has since transitioned and is now under JAK Holding Group.

i Pest Control's services are first defense against Pests at Residential and Commercial seekers in the Kingdom of Bahrain. We are a Pest Control company which is specialized in protecting your property before pests become a problem.

# Mission & Vision.

## MISSION

- Our mission is to deliver the best fumigation & pest control services and set a benchmark in the industry. We ensure safe, pest-free cargo and shipping operations with ISPM-15 compliant solutions.

## VISION

- I Pest Control strives to provide the highest levels of integrity, customer service, and safety in protecting the residences of the Kingdom of Bahrain. At the same time, we are dedicated to delivering world-class pest management solutions for shipping, cargo, and commercial facilities, ensuring compliance with ISPM-15 standards and safeguarding global trade.

## ACCREDITATION

- **ISO 9001:2008 Certification** A globally recognized quality management standard developed by the International Organization for Standardization (ISO). It provides a framework for organizations to improve processes, meet customer requirements, and ensure consistent quality.
- **NPMA Certification** Accreditation from the National Pest Management Association, ensuring adherence to professional pest control standards in the U.S.
- **BPCA Certification** Accreditation from the British Pest Control Association, demonstrating compliance with UK pest management best practices and professional excellence.
- **Heat Treatment Certification:** Authorized to provide ISPM-15 compliant heat treatment for wooden pallets, crates, and dunnage used in global shipping.
- **The only certified provider of Sulfuryl Fluoride fumigation in Bahrain**, offering advanced pest elimination for cargo containers, ships, and storage facilities.

# IPEST CargoCare Solutions

IPC has over 12 years of expertise in pest management, serving both commercial and residential clients. For the logistics, shipping, freight, and cargo industries, we provide specialized fumigation services including Sulfuryl Fluoride (SF), Aluminum Phosphide (AIP), and eco-friendly heat treatment, all fully compliant with international **ISPM 15 standards** for wooden packaging and containers. Alongside these treatments, our integrated pest management programs are tailored to safeguard commodities, warehouses, and shipping operations, ensuring safe cargo movement, compliance with global trade requirements, and reliable protection for businesses and households alike.

## SULFURYL FLURIDE FUMIGATION

- Ideal for containers, warehouses, and bulk shipments.
- Ensures compliance with international fumigation standards.

## ALUMINUM PHOSPHIDE FUMIGATION

- Cost-effective solution for stored commodities and freight.
- Widely used in shipping and logistics industries.

HEAT TREATMENT

## HEAT TREATMENT

- Eco-friendly, chemical-free option.
- Essential for wooden packaging, pallets, and containers.
- Fully compliant with ISPM 15 standards for international shipping.

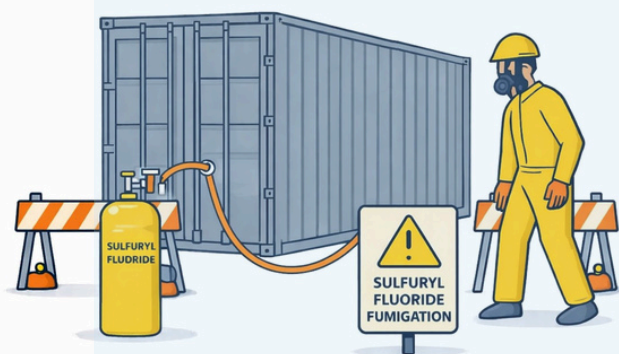

INTEGRATED PEST CONTROL

## INTEGRATED PEST CONTROL

- Preventive inspections, monitoring, and tailored programs.
- Long-term protection for logistics hubs and commercial facilities.

# Exclusive Service Provider of Sulfuryl Fluoride Fumigation

"We are proud to be the only certified company in Bahrain offering full sulfuryl fluoride fumigation services, ensuring compliance with new regulations and providing safe, effective pest control".

## What Is Sulfuryl Fluoride?

Sulfuryl fluoride ( $\text{SO}_2\text{F}_2$ ) is a colorless, odorless fumigant gas widely recognized as the leading alternative to methyl bromide. Globally, it is used for stored commodities, food facilities, shipping containers, and structural fumigation. It is widely recognized as the leading global alternative to methyl bromide.

In Bahrain, our certified operations are strictly limited to:

• **Container & Vessel Fumigation** – ensuring pest-free shipments that comply with international trade requirements.

**Wooden Pallet Fumigation** – meeting ISPM-15 standards for export, with official certification provided to exporters.

## How we do it

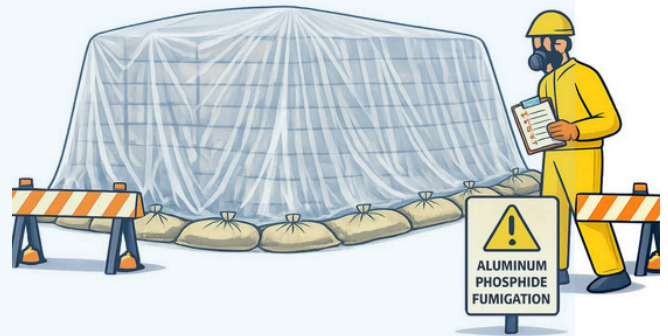

- 1 Site Inspection
- 2 Preparation - Sealing & Setup
- 3 Fumigant Release
- 4 Circulation & Monitoring
- 5 Ventilation & Clearance
- 6 Certification & Handover

# Safe, Certified ALP Fumigation for Food Commodities in Bahrain

## What Is Aluminum Phosphide (ALP)?

Aluminum phosphide (ALP) is a solid fumigant widely used in the protection of stored food commodities. When exposed to moisture, ALP releases phosphine gas ( $\text{PH}_3$ ), which is highly effective against a broad spectrum of stored-product pests. It is recognized globally as a cost-effective and reliable solution for commodity fumigation.

It is commonly applied in:

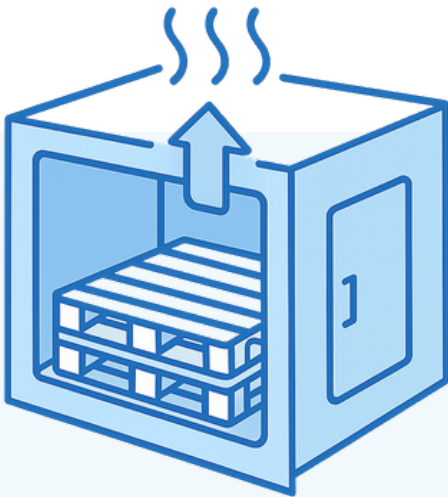

- **Food commodities** such as grains, rice, flour, nuts, and pulses
- **Storage facilities** including silos, warehouses, and mills
- **Bulk storage bags and containers** used in food supply chains
- **Export shipments** requiring pest-free certification for international trade

## How we do it

- 1 Site Inspection
- 2 Preparation - Sealing & Setup
- 3 Fumigant Release
- 4 Circulation & Monitoring
- 5 Ventilation & Clearance
- 6 Certification & Handover

# Certified Heat Treatment for ISPM-15 Standard Wooden Pallets

## What Are Heat Treated Pallets?

A heat treated pallet (HT pallet) is a wooden pallet that has been heated to a minimum core temperature of 56°C (132.8°F) for at least 30 minutes, eliminating pests and pathogens. This treatment makes the pallet ISPM 15-compliant, safe for export, and more durable than untreated pallets.

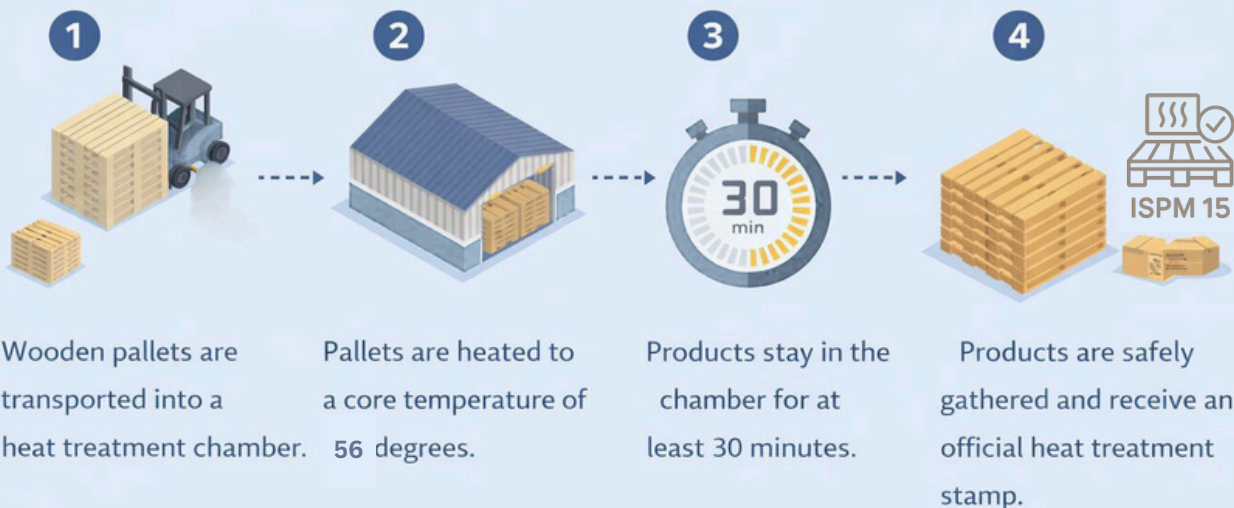

## Who Needs ISPM-15 Heat Treatment Services

- Exporters & Manufacturers
- Importers & Distributors
- Freight Forwarders & Logistics Companies.
- Agriculture & Food Industry
- Large Corporates & Multinationals

## Why ISPM-15 Certification Matters

- Global Standard: Wooden pallets must be heat treated at 56°C for 30 minutes.
- Pest-Free Shipping: Treatment kills insects and pathogens.
- Easy Proof: The ISPM-15 stamp on pallets replaces paper certificates.
- Stamp Info: Shows country code, provider ID, and method (HT = heat treatment).
- Smooth Trade: Recognized worldwide, avoids customs delays.
- Exporter Advantage: Faster clearance, fewer rejections, and compliance with global rules.

## How we do it

# General Pest Control Services for Cargo & Commercial Facilities

## Our Services

- **Rodent Control:** Prevents rats and mice from damaging goods, contaminating storage areas, and spreading disease.
- **Cockroach Control:** Eliminates infestations in warehouses, ships, and container yards to maintain hygiene.
- **Bed Bug & Insect Control:** Specialized treatments for bed bugs, ants, flies, and other pests that can infest cargo containers or staff facilities.
- **Container & Ship Treatment:** Pest management for cargo containers, ships, and surrounding storage areas to ensure compliance with international trade standards.
- **Facility Protection:** Comprehensive pest control for warehouses, offices, and logistics hubs to safeguard employees and goods.

## Integrated Pest Management Program

1

### 1. Inspection & Monitoring

- Regular surveys of warehouses, cargo containers, ships, and storage areas.
- Monitoring traps and detection devices for rodents and insects. Early identification of pest risks before they spread.

2

### 2. Sanitation & Prevention

- Cleaning and waste management protocols to reduce food/water sources.
- Sealing entry points in facilities and containers.
- Guidance for staff on preventive practices.

3

### 3. Rodent Control

- Use of bait stations, traps, and exclusion methods.
- Safe, targeted treatments to prevent contamination of goods.

4

### 4. Insect Control

- Cockroach, ant, fly, and bed bug management with approved chemicals.
- Residual sprays and gel baits for long-term protection.

5

### 5. Fumigation Services or Heat Treatment

- Sulfuryl Fluoride fumigation (exclusive in Bahrain) for cargo containers, ships, and large storage areas.
- Eliminates hidden pests in wood, packaging, and goods.
- Certified heat treatment of wooden pallets and crates at 56°C for 30 minutes.
- Ensures compliance with ISPM-15 standards for global trade.

6

### 6. Documentation & Compliance

- ISPM-15 stamps for treated pallets.
- Service reports and compliance certificates for fumigation and pest control.
- Support for smooth customs clearance and international regulations.

# Why I Pest Control?

## Certified Provider

We are Bahrain's only certified heat treatment provider with a dedicated plant and the exclusive certified provider of Sulfuryl Fluoride fumigation, ensuring ISPM-15 compliance and advanced pest management for global trade.

## Safety & Precision

Our trained teams deliver reliable heat treatment with strict monitoring, guaranteeing safe, effective results that protect both goods and people

## Global Compliance

We handle all permits and requirements, providing official certification recognized worldwide. Exporters can rely on us for smooth customs clearance and hassle-free international trade
